DETAILED ACTION

Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: in claim 1 the applicant recites "a lateral access opening" in lines 3, however in the specification the applicant only refers to a lateral access and hence its unclear which opening the applicant is referring to.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the lateral access opening must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

3. Claim 27 objected to because of the following informalities: Claim 27 depends on claim 1 which has been cancelled in the preliminary amendment filed in papers No. 6. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 14-27 are rejected under 35 U.S.C. 102(b) as being anticipated by International Patent WO 95/25953 to Boselli et al.

Boselli teaches a tube 1 for retaining fluid, the tube includes an outer wall a lateral access 8, a dome portion 6 and 7, including a sealing surface on the outside wall of the tube surrounding the lateral access opening, and a sensor 12 sealingly disposed on the sealing surface surrounding the lateral access in the tube. (figure 1)

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roz Ghafoorian whose telephone number is 703-305-2336. The examiner can normally be reached on 8:30am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on 703-308-3552. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0858.
